ECO - CONFERENCE[®] : MOTIVES

The Resolution of Eco-Conference[®] in 1995 stated that the scientific-professional Conference on environmental protection of urban and suburban settlements would be organized in Novi Sad every odd year.

The organizer was motivated by the fact that the industrial development and intensive urbanization have not been accompanied by rational use of natural resources or protection of the environment. The initial idea was that Eco-Conference[®] should become a traditional meeting of scientists and professionals who would contribute to solutions of various environmental problems by presenting and exchanging experiences, opinions and ideas.

In order to complete the general goals of the conference programme, the complementary Eco-Conference[®] on safe food has been organized in even years starting from 2000.

From 2007, the Eco-Conference[®] has a purely scientific character, as decided by the Programme Council of the Ecological Movement of Novi Sad, as its organizer.

ECO - CONFERENCE[®] : OBJECTIVES

The Eco-Conference[®] is organized in order to:

- Provide objective views (avoiding under - or overestimating) on causes/agents contributing to environmental disbalance and levels of ecological threats to urban and suburban environment.
- Provide valuable information-communication basis for developing mid-term and long-term strategic programmes for: (a) integral environment protection, (b) commodity quality protection, (c) assessment of life quality and (d) promoting and supporting the concept and practice of sustainable development.

Consequently, each Eco-Conference[®] is a multi-dimensional event, in which scientists and experts of various profiles present and discuss numerous aspects of living and working conditions.

ECO - CONFERENCE®: THEMATIC SCOPE

Papers submitted for the Eco-Conference® may target any topic within the Conference's general thematic framework:

a) Physical components of urban environment related to places of work, residence and recreational activities:

- Air, water, soil, biosphere
- Noise, vibrations, radiation, light.

b) Social components of urban environment:

- Socio-economic position, security, employment, civil rights concerning work, education, retirement
- Cultural-spiritual values, heritage, traditional crafts
- Security challenges and community support to the family as the basic social unit.

In respect of the industrial civilization expansion, intense urbanization, demographic changes, economic turbulence in transitional societies, the Eco-Conference® focuses on causes and consequences of environmental degradation, as well as on protection measures, resources and activities, improvements and good practices.

The general thematic framework stresses the fact that there are no borders preventing the chain-effects of environmental degradation and also covers the problems related to processing industries (chemical, oil, textile, leather, metal, cellulose...).

OFFICIAL LANGUAGE OF THE ECO - CONFERENCE®

The Eco-Conference® official language is English.
The Proceedings are published in English.

SESSIONS

Session 1: Environment: a) air; b) water; c) soil and d) biosphere

Session 2: Technical-technological aspects of environmental protection (eco-engineering)

Session 3: Social aspects of environmental protection (sociological, health, cultural, educational, recreational) with special emphasis on the protection of cultural heritage in urban and suburban settlements

Session 4: Economic aspects of environmental protection

Session 5: Legal aspects of environmental protection

Session 6: Designing an ecological system - informatics and computer applications in integral environmental protection

Session 7: Sustainable development of urban and suburban settlements - environmental aspects
